OVERPRINT VARNISHES

SonShine High Gloss Overprint Varnish

Universal high gloss overprint varnish. Sonshine provides an exceptionally high degree of abrasion resistance to the printed matter and can be used for both wet-on-wet and wet-on-dry printing. Sonshine has a very low tack, preventing the varnish from smearing when printing wet-on-wet. After varnishing the printed matter can be handled quickly. Sonshine's special composition minimizes the risk of blocking. This elastic, high-gloss varnish withstands cutting and creasing.

V 5039 - 1 kg
V 5040 - 2,5 kg

SonMatt Matt Overprint Varnish

Provides an excellent matt effect to the printed matter and can be used for both wet-on-wet and wet-on-dry printing. Spot varnishing or using a combination of glossy and matt varnish can create special effects.

V 5081 - 1 kg
V 5080 - 2,5 kg

SonSeal Gloss Overprint Varnish

Universal gloss overprint varnish which can be used as any classic press varnish. SonSeal offers good protection to the printed matter in a quick and economical way. SonSeal can be used for both wet-on-wet and wet-on-dry printing.

V 5060 - 2,5 kg

SonSilk Silk Overprint Varnish

Provides non-yellowing, silk effect finish, combined with excellent rub resistance. Fast setting and drying, with excellent stability and a low tack level. SonSilk can be used for both wet-on-wet and wet-on-dry printing.
